2024 COACH COMMENT

This could be the breakout year Chase has been working toward. He is projected as a Varsity starter on the mound for us and could rack up a lot of innings if he stays healthy and produces like he did last Summer. He's got his velocity up as well as his strength. Shows signs of big offensive potential. If he can have a consistent year at the plate he could drive in a lot of runs at the bottom half of the line-up.

2023 COACH COMMENT

Chase will start at the JV level. Has shown the capability to produce offensively and could see some Varsity at bats. Could also see some Varsity mound time as well. Improves each year so 2023 could be good to Chase?

2022 COACH COMMENT

Chase is another Sophomore pitcher trying to move his way up the crowded depth chart on the mound. Improved speed and agility. He swings hard and can drive the baseball. Could be a bit of breakout season?

2021 COACH COMMENT

Chase projects to get better each season. He is an effective strike thrower on the mound and also swings a pretty nice bat with a some power. Defensively could get work in as an outfielder and corner infielder.

PLANS AFTER HIGH SCHOOL

Will play college baseball at Big Bend Community College in Moses Lake, Washington.
